

Customer Feedback

"It is exactly what I wanted!! Thank you for such a wonderful product. I have told all my friends about it. We love it! Thank you!"

Cheryl, Pottstown PA

"We are extremely happy with our FeelsWarm granite heater. Guests will come over and be astonished that the granite wasn't cold like most stone. Family members will come visit and immediately place their hands on the granite to warm their hands. Without a doubt, it has enhanced our kitchen and home. I would recommend this product for every home in the northern climates. You will be amazed to how much it helps keep your arms and hands warm."

Dorothy, Burnsville MN

"When we remodeled our home office with quartz desktops we were extremely concerned about the cold of the stone. After some research, we found your product and ordered the first two heaters, they have exceeded my expectations. In fact they were so good, we ordered a third heater to expand the coverage on the second desk. Thank you for such a fantastic product and purchasing experience."

DJ, Apex NC

"I love the counters!!! I have been sitting at the counter most of the night and they are awesome. I will definitely be promoting these when people come over. Thanks for all your help getting exactly what we need. Thanks!"

Karen, Tacoma WA

"My countertops are connected to the outside wall of my house and are getting very cold in the winter. With the heating system installed, I can sit at my bar without freezing my arms off!"

Markus, Salt Lake City UT

"We love our FEELS WARM HEATED COUNTERTOP. We have a countertop/bar in the kitchen that we use for eating most of the time and our arms/hands were always cold. Now we are warm. Also it keeps our plates warm, so our food stays warmer too. Loved it from the beginning."

Patricia, Cresco IA

"You really don't know what you are missing until you have it. I have such a bigger appreciation for my countertop and my wife loves it!"

Matt, New Haven IN

"Love my FeelsWarm counter tops!!"

Sue, Lakeville MN

"Worked like a charm. Installation was easy....I was worried that I would have to trim the top of the cabinet doors, but your sheet was thin enough to fit in a 3/16" gap. Hate to say it....But I can't wait for winter"

Carmen, Cinnaminson NJ
